

Anmol Kumar

Senior .Net Developer

09211352231

anmchaudhary@gmail.com

<https://www.linkedin.com/in/anmchaudhary1996/>

- Over 5+ years of experience in Microsoft technologies with deep expertise in C#, .NET Core, .NET 6+, ASP.NET MVC, and Web API for scalable backend development.
- Proven ability to design and deliver secure RESTful APIs with OAuth2/JWT authentication, versioning, and enterprise-grade scalability.
- Hands-on experience with event-driven architectures and asynchronous messaging using AWS SQS and similar queue-based platforms.
- Skilled in leveraging AWS services (S3, SQS, RDS, CloudWatch) to build resilient cloud-native applications; exposure to Azure fundamentals for hybrid solutions.
- Strong background in system integrations and workflow automation, enabling seamless enterprise data exchange and process orchestration.
- Experienced in microservices architecture and distributed systems, applying domain-driven design for maintainable solutions.
- Expertise in Entity Framework Core, LINQ, ORM concepts, and repository patterns for efficient enterprise data access.
- Proficient in SQL database schema design, optimization, and performance tuning for large-scale systems.
- Familiar with CI/CD pipelines, DevOps practices, Git version control, and Docker containerization; exposure to monitoring/logging tools like CloudWatch.
- Skilled in full-stack development using Angular and React, with strong knowledge of JavaScript, TypeScript, HTML5, CSS3, and Bootstrap for responsive UI.
- Built React-based dashboards and dynamic forms for real-time data visualization and improved user experience.
- Strong understanding of software design principles, debugging, troubleshooting, and modernization of enterprise applications; committed to secure coding practices and compliance standards.
- Collaborative team player with experience in Agile/Scrum environments, code reviews, unit testing, and technical documentation.

TECHNICAL SKILLS

- **AI Productivity Tools:** Copilot and ChatGPT for code reviews, documentation, optimization
- **Visual Dev Tools:** MS Visual Studio 2017/2019 Developer (Open Source .NET Development IDE)
- **Languages/Frameworks:** VB, ASP.NET, C#, AJAX, LINQ, Web Forms, MVC, .NET Core, .NET 6+
- **Scripting Languages:** JavaScript, jQuery, TypeScript
- **Relational Databases:** SQL Server 2008/2016, MS Access, RDS (AWS)
- **Database Design:** Schema modeling, query optimization, indexing, performance tuning
- **Version Control Systems:** Team Foundation Server (TFS), SVN, Git, Bitbucket
- **Web Technologies:** HTML, DHTML, CSS, XML, CSS3, HTML5, Bootstrap
- **Automation:** Selenium with C# for automated testing
- **Front-End Technologies:** Angular 12+, React.js
- **Cloud Platforms:** Microsoft Azure, AWS (S3, SQS, RDS, CloudWatch), Azure App Services
- **Event-Driven Architecture:** Asynchronous messaging, queue-based systems (AWS SQS)
- **Authentication & Security:** OAuth2, JWT, secure coding practices, compliance standards
- **DevOps & CI/CD:** Git, Bitbucket, TFS, build/deployment pipelines, release management
- **Containerization & Monitoring:** Docker, AWS CloudWatch, stack for monitoring/logging
- **Design Principles:** Microservices architecture, distributed systems, domain-driven design

EDUCATION QUALIFICATION:

EXAMINATION	BOARD /UNIVERSITY	SCHOOL /COLLEGE	YEAR
MCA	IGNOU	Universal Institute of Computer and Technology	2019
BCA	Magadh University	MSY College Gaya	2016
Intermediate Examination	BSEB Board	CBLK College Bariarpur Munger	2013
High School Examination	BSEB Board	Philips High School Bariarpur Munger	2011

EXPERIENCE

Closetloop Technologies	Software Engineer	June 2025 to Nov 2025
Sterling	Software Engineer	Feb 2024 to Oct 2024
Softgigs Solutions	Senior Software Engineer	March 2020 to Feb 2024

Responsibilities: -

Design, Analysis, Application trouble shooting, Technical Support onsite/offsite and development of Projects

Accomplishment:

Completed projects for various clients delivered on schedule.

Projects:**LastPass**

Client: LastPass (June 2025 -Nov 2025)

Team Size: 20

URL: <https://www.lastpass.com/>

LastPass is a popular identity and password management company, offering secure storage and autofill for credentials for individuals, families, and businesses, led by CEO Karim Toubba, known for its encrypted password vault and features like passkey support, though it's faced security challenges

Roles and Responsibilities:

- Worked on migrating third party library
- Deployment of the project in different environment
- Worked on all different projects/platform for the current application.
- Change some processes with the new implementation in the current project
- Utilized AI tools such as **GitHub Copilot and ChatGPT** for code reviews, documentation, optimization, and providing technical suggestions, resulting in faster development cycles and improved code quality

Environment: Visual Studio 2024, WEB API .SQL Server 2016.Net Core,Linq,

Sterling Check

Client: Sterling Check (Feb 2024 -Oct 2024)

Team Size: 50

URL: <https://www.sterlingcheck.com/>

a major global background screening company that helps employers verify candidates' work history, education, criminal records, and credentials to ensure safe hiring, offering services like employment verification, criminal record checks (national & local), and identity verification, with processes ranging from quick digital checks to in-person ID verification.

Roles and Responsibilities:

- Conducted requirement analysis and contributed to application design.

- Managed migration of third-party libraries to ensure compatibility and stability.
- Executed project deployments across multiple environments.
- Collaborated on diverse projects and platforms within the current application ecosystem.
- Implemented process improvements through new project enhancements.

Environment: AWS,Visual Studio 2024, WEB API .WebForm,SQL Server 2016.Net Core,Linq,

Client:Kastle System (March 2020 -Feb 2024)

Team Size: 50

URL <https://www.kastle.com/>

Company has been leading the security industry since 1972 with advanced managed security solutions and services, protecting the who's who of commercial real estate, multifamily communities distinguished global retail brands, leading global enterprises, educational institutions, and critical government facilities.

Roles and Responsibilities(Microservices Migration Experience):

- Worked on new features and functionality to enhance enterprise security applications.
- Resolved bugs and implemented system improvements to ensure stability and performance.
- Deployed projects across multiple environments, managing release cycles and environment-specific configurations.
- Contributed to multiple projects/platforms within the current application ecosystem, ensuring seamless integration.
- Modified existing processes with new implementations to improve efficiency and scalability.
- Designed and implemented **independent microservices such as Personnel, Card, Email, and Visitor**, ensuring clear separation of concerns.
- Developed RESTful APIs for inter-service communication, focusing on scalability, maintainability, and secure API design.
- Implemented event-driven architecture using **AWS SQS for asynchronous messaging**, enabling decoupled service communication and reliable message delivery.
- Enabled independent deployment and scaling of services, reducing downtime and improving performance.
- Utilized **Redis cache for storing card details**, enhancing quick retrieval and reducing database load.
- Integrated **AWS CloudWatch for storing and monitoring logs**, improving observability, alerting, and troubleshooting.
- Used **AWS S3 bucket for storing and managing images** securely and efficiently.
- Implemented SQL queries **for audit logging and storage, ensuring traceability**, compliance, and data integrity across services.
- Designed normalized schemas, **optimized queries, and implemented indexing strategies** to improve database performance.
- Implemented **JWT-based authentication/authorization** for secure API access and compliance with enterprise security standards.
- Created reusable Angular components to enhance UI modularity and maintainability.
- Performed UI manipulations by adding new fields in existing screens and ensuring seamless integration with backend services.
- Extended UI functionality by adding additional properties/fields from backend APIs, improving user experience and data visibility.
- Collaborated with Product, QA, and DevOps teams for end-to-end delivery, participating in **Agile/Scrum ceremonies, code reviews, and unit testing**.
- Implemented CI/CD **pipelines for microservices, enabling automated builds, deployments**, and release management.
- Applied secure coding practices, compliance standards, and domain-driven design principles to ensure maintainable and scalable solutions.
- Enhanced observability by integrating CloudWatch for centralized monitoring and logging.
- Led sprint planning, backlog grooming, and daily stand-ups as a Scrum team lead, ensuring alignment, prioritization, and timely delivery of features.
- Mentored junior developers through code reviews, pair programming, and knowledge-sharing sessions, fostering team growth and technical excellence.

Environment: Visual Studio 2019, Bootstrap, HTML5,, MVC, WEB API .SQL Server 2014,Angular 12,ASP.Net Webform .Net Core, Microservices,Azure and AWS

Phoenix Client: EnelX (Jan 2023 -Feb 2024)

Team Size: 35

URL: Not available

Enel X Global Retail is the Enel Group's global business line operating in the field of energy supply and energy management services, with a portfolio of products and value-added services to incentivize more independent and sustainable energy use

Roles and Responsibilities:

- Developed Excel bulk upload functionality to streamline large-scale data entry, improving operational efficiency and accuracy for energy management workflows.
- Implemented background jobs for automated mailing, ensuring timely communication and reducing manual overhead in customer engagement processes.
- Designed and delivered innovative energy management features, expanding the product portfolio and enabling smarter, independent energy usage for enterprise clients.
- Enhanced system stability and performance by troubleshooting and resolving critical issues, improving reliability for global retail operations.
- Collaborated across diverse projects and platforms, integrating solutions into the broader Enel Group ecosystem to deliver value-added services.
- Built interactive dashboards and dynamic forms using React.js, enabling real-time data visualization, improved user experience, and seamless integration with backend APIs.

Environment: Visual Studio 2022, Bootstrap, React, WEB API .SQL Server 2019,React Js 18 ,ASP.Net Core , AWS, Google API and Other third-party library

DSB Transport

Client: Tochi Interprise (March 2021 -Dec 2022)

Team Size: 1

URL:<https://www.dsbtransport.com/>

DSB Transport consistently provides excellent services for a variety of railroad crews. drivers strive to provide our clients with the most comfortable, reliable and safe transportation possible

Roles and Responsibilities:

- Implemented Business Components and Data Layer Components using Microsoft Patterns in C#
- Implemented Base Classes and Components, Concurrency Management and Exception Management using C#.
- Participated in designing of solutions and identification of technologies to uses.
- Design of various service interfaces along with concurrency and security
- Design the base class to import data from Microsoft Project Plan and migrating system data to Microsoft Project Plan.
- Participation in database design.
- Design WEB API services
- Form Based Authentication, Filters and Validations

Environment: Visual Studio 2015, bootstrap UI JS, Bootstrap, HTML5,, MVC,,Net Core WEB API .SQL Server 2014
