

Siva Dattatreya

.NET Developer | Backend & Automation Specialist

📍 Ahmedabad | ✉ sriorg2019@gmail.com | 📞 6303302707 | 🔗 [linkedin.com/in/siva-dattaraeya-nagubandi-a37716230](https://www.linkedin.com/in/siva-dattaraeya-nagubandi-a37716230)

Professional Summary

Motivated .NET Developer with 6 years of experience designing and deploying scalable backend systems, ETL pipelines, and business process automation for US-based retail and warehouse clients. Proficient in ASP.NET Core, Web API, SQL Server, Azure Databricks, and Power Automate. Experienced in delivering production-grade solutions across warehouse management, data transformation, file migration, and API-driven automation workflows. Strong track record of collaborating with cross-functional teams in Agile environments and driving measurable impact through clean, maintainable code.

Relevant Experience Summary

- **C# / .NET / .NET Core:** 6 Years
- **ASP.NET MVC & Web API:** 6 Years
- **SQL Server:** 5 Years
- **Azure Databricks:** 2 Years
- **Cloud (Azure):** 2+ Years
- **Power Automate & SharePoint:** 1.5+ Years
- **CI/CD & DevOps Tools (GitHub, Jenkins):** 2+ Years
- **Agile / Scrum Methodologies:** 2+ Years

Technical Skills

- **Languages & Frameworks:** C#, ASP.NET Core, MVC, Web API, LINQ, Entity Framework
- **Databases:** SQL Server, MySQL, Azure Databricks
- **Cloud (Azure):** Microsoft Azure, Azure DevOps, Azure Durable Functions (*learning*)
- **Automation & Collaboration:** Power Automate, SharePoint, Microsoft Lists, Microsoft Graph API
- **CI/CD & Source Control:** GitHub, Jenkins
- **Libraries:** ClosedXML, EPPlus, iText7, Serilog
- **Other:** Agile/Scrum, Unit Testing, REST API Design

Professional Experience

Software Developer | Syfrox | Mar 2024 – Present

Working on end-to-end backend development and automation solutions for US-based retail and warehouse clients. Responsibilities span ASP.NET Core Web API development, ETL pipeline design, large-scale file migration, and business process automation using Power Automate and SharePoint. Delivered multiple production-grade applications handling real-time data transformation, PDF/Excel processing, cloud storage integration, and automated reporting workflows. Collaborate closely with cross-functional teams across time zones following Agile practices.

Projects:

- **BlueCherry Pick Ticket Project** – Warehouse management project handling pick tickets and cartons; implemented carton assignment logic and generated 940/945 DAT files for 3PL logistics.
- **Individual Commit Generator** – Automated Excel data processing per CommitId; created multi-sheet reports with ClosedXML/EPPlus and structured logging using Serilog.

- **Lands End / Walmart / Target Data Transformation** – Processed and validated large vendor files (orders, styles); standardized inputs for warehouse systems using MVC modules.
- **Vendor Report Extraction System** – Extracted structured tabular data from PDFs; developed backend with ASP.NET Core Web API, used iText7 for PDF parsing, ClosedXML for Excel export, and React for UI.
- **YPLM Restaging Application** – Internal tool to update ExportTypeld in SQL Server logs based on style numbers.
- **Cost Collection Platform** – Centralized platform for worksheet-based costing and reporting.
- **Anthropologie PDF & Excel Processing** – Automated PDF and Excel file processing with Dropbox integration and Azure Databricks storage for retail data workflows.
- **Venus Image Migration Application** – Migrated 630,000+ product image files from legacy storage to OneDrive across two batches (YES and NO priority). Implemented parallel processing, complex file naming conventions, sequence numbering logic, state tracking with resume capability, and parallel cleanup scripts to manage disk space during continuous migration.
- **IT Budget Forecast Automation** – Built a Power Automate flow to automatically roll up invoice totals from Microsoft Lists and update the 2026 Actual column in the IT Budget Forecast SharePoint list.
- **PIXORD Returns Automation (Phase 1 & 2)** – Phase 1: Built and deployed an ASP.NET Core Web API to process PIXORD returns files, with structured processing summary responses, file hash-based duplicate detection, and shared folder output. Phase 2: Built a Power Automate cloud flow monitoring a shared mailbox, automatically extracting attachments and triggering the API for end-to-end returns processing.
- **FTDI Cycle Count Automation** – Built a Power Automate flow to automate monthly cycle count reporting from an FTDI shared mailbox. Implemented Switch-based routing logic to parse and append monthly data (Style, Color, Size, Qty, Date) into a Running Tally SharePoint file, eliminating manual data entry.

Responsibilities:

- Built and maintained ASP.NET Core MVC and Web API modules.
- Created ETL-like pipelines (Excel/PDF → SQL → standardized output).
- Optimized SQL queries and Azure-based deployments.
- Implemented logging and monitoring with Serilog.
- Automated file migration workflows with parallel processing and state tracking for large-scale datasets.
- Built end-to-end Power Automate flows for business process automation using shared mailboxes, Microsoft Lists, and SharePoint.
- Designed and deployed REST APIs integrated with Power Automate for automated file processing workflows.

Tech Stack: ASP.NET Core, MVC, Web API, SQL Server, Azure Databricks, Azure, ClosedXML, EPPlus, iText7, Serilog, Power Automate, Microsoft Lists, SharePoint, Dropbox API.

.NET Developer | Sruta Digital Solutions | Oct 2022 – Feb 2024

Worked on Patasala.in, a product-based web application for school and college management. Contributed to building and maintaining core modules covering student records, attendance, fee management, and reporting. Developed role-based authentication, admin dashboards, and backend business logic. Optimized SQL queries for performance and collaborated with the team in an Agile environment.

- Contributed to **Patasala.in**, a product-based web application for school/college management.
- Built modules for student records, attendance, fees, and reporting.
- Developed role-based authentication and admin dashboards.
- Designed backend logic and optimized SQL queries for performance.

Tech Stack: ASP.NET Core MVC, SQL Server, Bootstrap, jQuery

.NET Developer | Cloudseed Technologies | Sep 2020 – Sep 2022

Worked on multiple enterprise applications for a South African client, focusing on locomotive asset management, motor insurance claim processing, vehicle risk assessment, and recruitment verification systems. Developed backend APIs and modules using ASP.NET Core and Web API, designed and optimized SQL Server and MySQL queries, and built data-driven dashboards and reporting modules for analytics.

Projects:

- **TrainCloud** – Built a dashboard for managing locomotive assets, tracking daily availability, and monitoring rakes (wagon groups) from source to destination across South Africa and Africa.
- **RBVR** – Developed backend modules and APIs for vehicle tracking and driver risk assessment, including driver scores, speeding reports, and collision analysis.
- **MUA iParts Select** – Implemented modules for managing motor insurance claim workflows, auto parts selection, and repair cost tracking to enhance process efficiency.
- **MUA Mauritius** – Created Web API integrations for the MUA platform to manage auto claims, improve repair cycle visibility, and streamline communication between repair service providers.
- **RefCheck** – Developed a recruitment verification application to validate candidate information and employment history, improving accuracy in pre-employment checks.

Responsibilities:

- Developed backend APIs and components using ASP.NET Core / Web API.
- Designed and optimized SQL Server and MySQL queries, stored procedures, and functions.
- Built data-driven dashboards and reporting modules for analytics.
- Performed requirement gathering, unit testing, and bug fixing for live systems.
- Collaborated with cross-functional teams for integration and deployment.

Tech Stack: ASP.NET Core, Web API, SQL Server, MySQL, Entity Framework, Azure, Git

Technical Support & Software Developer | Mee-Seva CSC | 2008 – 2019

Worked under the Integrated Services Delivery Gateway (ISDG) initiative, supporting both Government-to-Citizen (G2C) and Business-to-Citizen (B2C) services, delivering seamless access to public utilities and e-governance applications.

Key Contributions:

- Delivered a wide range of citizen services including certificates, licenses, identity cards, social welfare pensions, land registration, online RTI filing, and government tax services.
- Designed and maintained websites and applications to enhance service delivery and operational efficiency.
- Developed the official website for AP Punnami Tourism & Travels, improving public access to tourism information and booking services.
- Created custom software solutions for local merchants, including modules for inventory tracking, billing, and financial management.
- Supported Anusha Projects (Civil Engineering division) in canal layout design for the Polavaram Project, preparing AutoCAD-based canal drawings using provided dimensional data and specifications.

Tech Stack: MS-Office, Adobe PageMaker, Photoshop, CorelDraw, AutoCAD, ASP.NET, ASP.NET Core, MVC, Web API, SQL Server.

Certifications

- **Generative AI Fundamentals** — Databricks Academy
- **Claude AI 101** — Anthropic
- **Micro1 AI Certification** – REST API, MSSQL, C#, OOP & Design Patterns, Agile

Education

- **AMIE - Mechanical** — Institute of Engineers, Kolkata
- **Polytechnic (DME)** — MBTS Government Polytechnic, Guntur
- **SSC** — Suryodaya High School, Seethanagaram

Key Strengths

- Specialization in backend development with .NET Core and REST API design.
- Experience across warehouse, retail, education, insurance, and locomotive domains.
- Strong automation skills with Power Automate, SharePoint, and Microsoft Lists.
- Currently learning Azure Durable Functions and Azure API Management.
- Strong collaboration skills in Agile/Scrum teams across time zones.
